

Web page design and Picture design

Akimasa Takenaka
Schoolnet JAPAN
akimasa@fkc.ritsumeikan.ac.jp

Summer school in Kathmandu

GOALS FOR THIS LECTURE

- Learn how to work Web system
- Learn how to write HTML files.
- Learn how to write graphical page.
- You will write your original page.

How does work web system.

- Web's mean is spiders net.
- The internet is wide all over the world.
- HTML is written by TAG

HTML

- Hyper Text Markup Language
- HTML file is written by some tags.
- ex) `<H1>Nepal</H1>`
- Only plain text files.
- Let's write by vi editor

Basic style of HTML

- `<HTML>`
 - `<HEAD>`
 - `<TITLE> title is here </TITLE>`
 - `</HEAD>`
 - `<BODY>`
 - `body is here`
 - `</BODY>`
 - `</HTML>`

Use Bluefish

- ❑ HTML editor “Blue fish”
- ❑ Automatically insert TAGs
- ❑ Writable More expressive Webpage.
- ❑ And more easily write Webpage.
- ❑ Open source Software

Table Tag

- Table tag available.
- Make the table
- Sometime use for lay out

Table tag sample

```
<TABLE>
  <TR> ← First record
    <TD> </TD> ← 1st line
      <TD> </TD> ← 2nd line
  </TR>
  <TR> ← Second Record
    <TD> </TD>
    <TD> </TD>
  </TR>
</TABLE>
```

Create your webpage.

- Take some picture of your original idea.
- Around home, family, site viewing,
